

EIB STRATOC LIMITED

ABOUT EIB STRATOC

Where intelligence meets action.EIB STRATOC, owners of the Briech Intelligence Fusion Center (BIFC) and Briech Satellites, is Nigeria's premier Intelligence, Surveillance and Strategic Operations Company. We deliver advanced intelligence and surveillance services tailored to government, defence, security, and private sector clients combining real time intelligence, geospatial technologies, satellite communications, cybersecurity, and mission support into one integrated capability. Our platforms are engineered to ensure safety, enhance operational efficiency, and support national security efforts across Nigeria and beyond. From the border to the boardroom, EIB STRATOC transforms raw data into decisive advantage protecting lives, critical infrastructure, and national assets around the clock.

24/7	150,000+	200	Nationwide
Continuous Operations	Schools Monitored	Rack Tier III Data Center	Operational Coverage

SECURITY PRIVACY ACCESS

Our Vision

To serve as Nigeria's premier 24/7 centralized intelligence sharing hub promoting collaboration across public safety, defence, and law enforcement agencies in support of national security and crime prevention.

Our Mission

To anticipate, identify, and mitigate security threats by delivering actionable intelligence and situational awareness while upholding the civil rights and freedoms of every individual.

SATELLITE & INTELLIGENCE INFRASTRUCTURE

A world class foundation for national scale intelligence.

EIB STRATOC operates a world class, multi million dollar satellite teleport at our Idu, Abuja facility. This infrastructure supports real time data distribution and satellite image acquisition across Nigeria and the African continent, giving our clients an unmatched view of their operational environment. Our Strategic Operations Center is fully equipped to analyse and respond to security events through advanced satellite communication and geospatial intelligence tools turning orbital reach into ground level results.

SECURITY PRIVACY ACCESS

THE CLASSIFIED INTELLIGENCE FUSION CENTER

OUR CLASSIFIED INTELLIGENCE FUSION CENTER INTEGRATES DATA FROM MULTIPLE DISCIPLINES INTO A SINGLE, SECURE ANALYTICAL ENVIRONMENT

Open Source Intelligence **(OSINT)**	Human Intelligence **(HUMINT)**	Electronic Intelligence **(ELINT)**	UAV surveillance and wireless sensor networks	Satellite imagery and geospatial data streams

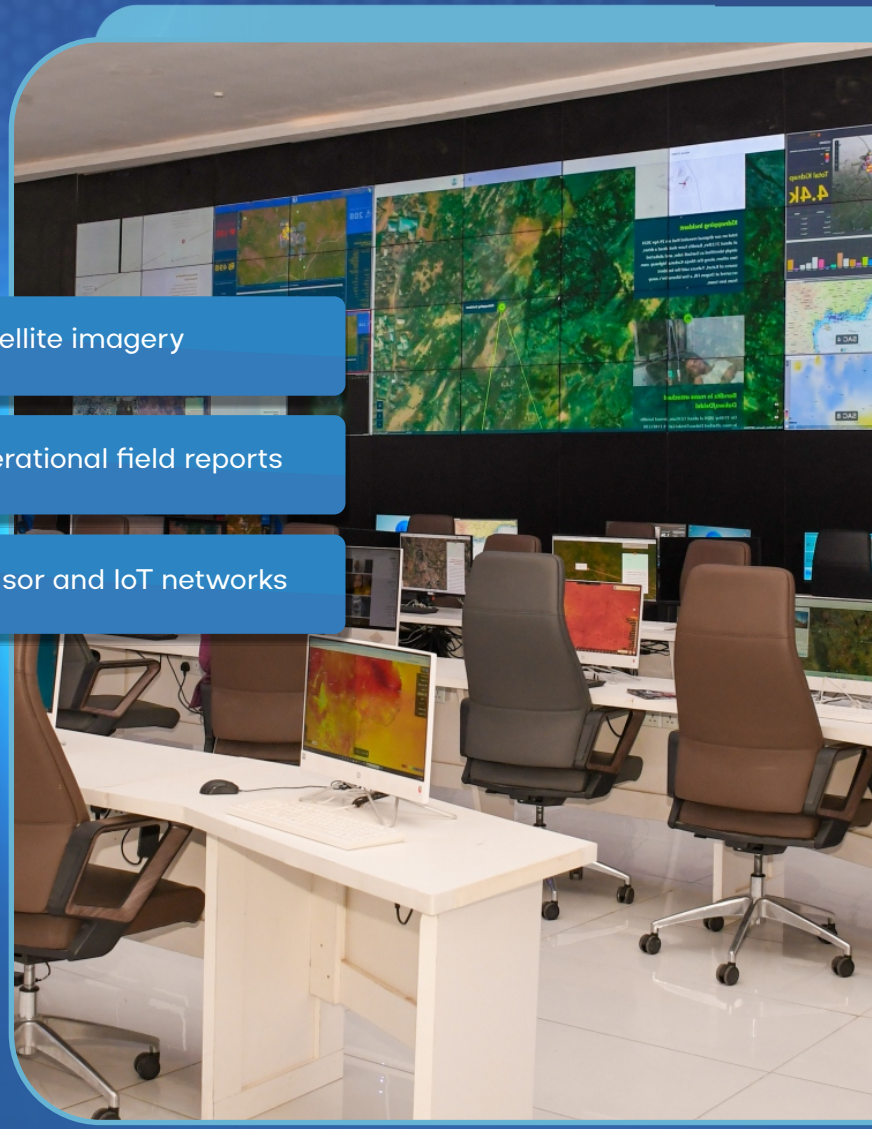

These data streams are securely analysed and disseminated to support threat detection, incident prevention, and confident decision making at every level of command.

SURVEILLANCE & INTELLIGENCE MONITORING SOLUTIONS.

ONE OPERATIONAL PICTURE. EVERY THREAT VISIBLE.

At the core of EIB STRATOC's operational capability is the Intelligence Fusion Centre a centralized command environment where intelligence from multiple sources is collected, validated, correlated, and transformed into actionable intelligence. Rather than relying on a single information stream, the Fusion Centre integrates data from:

1. UAV surveillance operations
2. Geographic Information Systems (GIS)
3. CCTV and remote surveillance systems
4. Human Intelligence **(HUMINT)**
5. Open Source Intelligence **(OSINT)**
6. Electronic Intelligence **(ELINT)**
7. Satellite imagery
8. Operational field reports
9. Sensor and IoT networks

BY FUSING THESE DIVERSE SOURCES INTO A SINGLE OPERATIONAL PICTURE,

our analysts rapidly identify emerging threats, monitor ongoing activities, detect anomalies, and provide decision makers with reliable intelligence for timely operational response.

REAL TIME MONITORING OF CRITICAL SECTORS

Our infrastructure enables real time monitoring of Nigeria's most critical sectors and environments, including:

- Border security
- Petroleum and gas pipelines
- Oil and gas facilities
- Election activities and public assets
- Roads and railways
- Maritime and coastal surveillance

INTELLIGENT VIDEO SURVEILLANCE

Our surveillance architecture incorporates high definition IP cameras strategically deployed across camps and facilities to ensure complete operational visibility. The solution includes:

1. **Fixed surveillance cameras**

2. **Pan Tilt Zoom (PTZ) cameras**

3. **Long range surveillance systems**

4. **Infrared night vision cameras**

5. **Mobile surveillance platforms**

Together, these systems deliver uninterrupted monitoring under all environmental and lighting conditions day or night, rain or shine.

Perimeter Protection

The perimeter is the first line of defence. EIB STRATOC integrates multiple layered perimeter security technologies to provide early warning long before intruders reach critical assets:

1. Intelligent fence monitoring
2. Motion detection sensors
3. Fibre optic intrusion detection
4. Radar surveillance
5. Thermal perimeter monitoring
6. Ground vibration sensors
7. Microwave barriers
8. Infrared beam sensors

Command and Control Centre

At the heart of every deployment lies the EIB STRATOC Command and Control Centre, providing operators with a unified operational picture of the entire protected environment:

- GIS mapping and live camera management
- Centralized monitoring and video wall management
- Incident and alarm management
- Resource tracking and operator dashboards
- Emergency coordination and communication management

Integrated Communication Systems

Effective incident response depends on seamless communication. Our platform ensures critical alerts reach responders instantly through:

- VoIP and Satellite communication systems
- Emergency call stations and public address systems
- Mass notification platforms
- SMS alerts and email notifications
- Dedicated mobile security applications

Threat Analysis

Threat analysis at EIB STRATOC extends far beyond observing live video streams. Our intelligence analysts continuously evaluate activities across operational theatres to identify indicators of potential threats before they escalate. This includes:

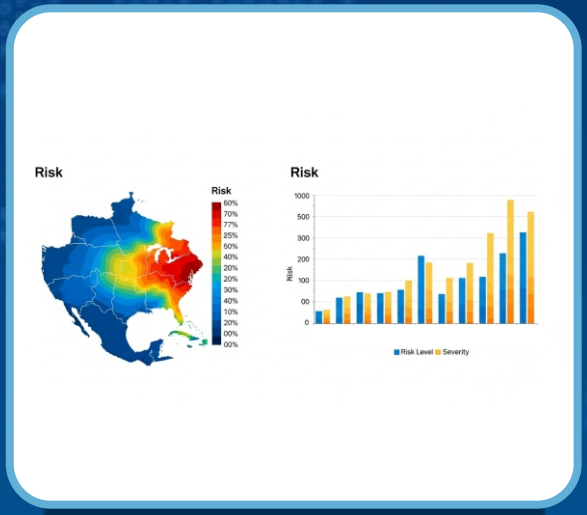

- Pipeline and energy infrastructure surveillance.
- Suspicious movement detection.
- Pattern of life analysis.
- Identification of hostile activities.
- Critical infrastructure monitoring.
- Border activity assessment.
- Terrorism and insurgency indicators.
- Protest and civil unrest monitoring.

RISK ANALYSIS

EIB STRATOC provides operational risk analysis by continuously assessing every factor that could affect mission success, infrastructure protection, and operational continuity. Our risk assessments cover:

- Security threats and operational vulnerabilities
- Equipment availability and infrastructure resilience
- Weather conditions and environmental factors
- Communication stability and power reliability
- Overall mission readiness

Situational Awareness 24/7

Maintaining real time situational awareness is one of the Fusion Centre's defining capabilities. Operating around the clock, the Centre continuously monitors:

- Drone operations and live surveillance feeds
- Satellite imagery and geographic mapping systems
- Camp and facility operational status
- National security events
- Critical infrastructure and environmental conditions

Intelligence Reporting

Collecting intelligence is only valuable when it is transformed into timely, actionable information. EIB STRATOC produces structured intelligence products that support operational commanders, security agencies, and strategic decision makers:

- Daily Situation Reports (SITREPs)
- Incident Reports and Operational Updates
- Threat and Risk Assessments
- Intelligence Briefs
- Infrastructure Status Reports
- Mission Support Reports

THE EIB STRATOC INTELLIGENCE FUSION SERVICE DELIVERS:

1. A modern command and control environment with large format video walls supporting real time intelligence visualization.
2. Multi domain intelligence integration combining satellite imagery, geospatial mapping, UAV feeds, and operational dashboards into a single common operating picture
3. Collaborative operations, with personnel from multiple security organisations working in a shared intelligence environment for coordinated response.
4. Mission focused analytics, where analysts monitor, interpret, and act on live operational data rather than simply observing camera feeds.
5. Training and capability development, building the skills of security personnel in the use of advanced intelligence systems.

EIB STRATOC'S INTELLIGENCE FUSION CENTRE

Is the operational heartbeat of our national security capability. By integrating satellite communications, unmanned aerial surveillance, geospatial intelligence, cyber monitoring, human reporting, and advanced analytics into a unified command environment, we deliver timely, accurate, and actionable intelligence that empowers government institutions, defence organisations, and strategic partners to anticipate threats, make informed decisions, and respond with confidence.

GEOSPATIAL INTELLIGENCE

Powering security and surveillance with GIS See. Understand. Act.

At EIB STRATOC, we turn location data into operational intelligence. Our GIS solutions give security teams the clarity to see threats, track movements, and make faster decisions on the ground.

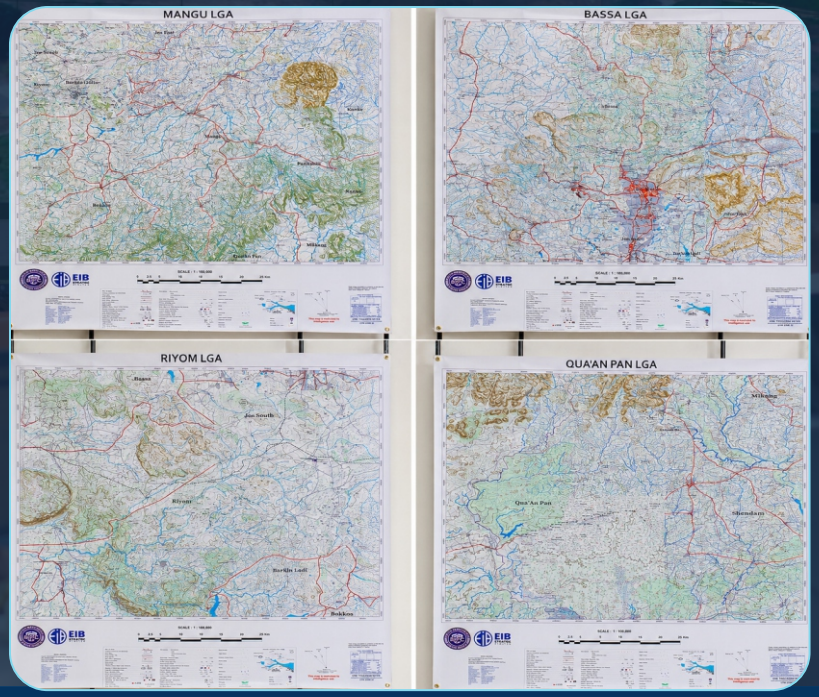

STORY MAPS: INTELLIGENCE THAT SPEAKS

We use interactive Story Maps to communicate complex security situations in a simple, visual way. Instead of long reports, decision makers see timelines, incident patterns, and response actions mapped in real time. How it helps: Commanders understand "what happened, where, and why" at a glance. Story Maps sharpen briefings, accelerate training, and elevate stakeholder communication.

24/7

Live Dashboards: Situational Awareness

Our GIS Dashboards consolidate surveillance feeds, patrol data, alerts, and resources into one live view. Analysts monitor hotspots, asset deployment, and response times without switching between ten different systems. How it helps: Realtime decisions. Faster deployment. Clear visibility of coverage gaps and active threats across all operational areas.

LGA Topographic Mapping
Terrain Driven Security

Security is shaped by terrain. EIB STRATOC has produced detailed topographic maps with contour data for key Local Government Areas in Plateau State where our camps are located including Bassa, Qua'an Pan, Barkin Ladi, Riyom, and Mangu. These maps reveal elevation, slopes, access routes, and natural barriers.

1. **Camp Planning:** identify high ground, drainage, and access points
2. **Patrol Routing:** plan safer, more efficient routes using terrain
3. **Risk Assessment:** predict ambush points, flood zones, and movement corridors

THE EIB STRATOC GIS ADVANTAGE

By combining Story Maps, Live Dashboards, and high resolution terrain analysis, EIB STRATOC delivers geospatial intelligence that protects people, assets, and communities.

NATIONAL PROJECTS & OPERATIONAL SUPPORT

Delivering intelligence driven operational excellence.

EIB STRATOC provides integrated operational support to government institutions, defence and security agencies, and private-sector organisations responsible for protecting critical national assets. Through our Intelligence Fusion Centre, UAV enabled Intelligence, Surveillance and Reconnaissance (ISR) capabilities, satellite communications, geospatial intelligence, and real time command support, we enhance operational effectiveness across some of Nigeria's most strategic projects and security environments. Our multidisciplinary approach combines intelligence collection, aerial surveillance, threat monitoring, and operational coordination to enable faster decision making, sharper situational awareness, and stronger mission outcomes.

CRITICAL INFRASTRUCTURE PROTECTION

EIB STRATOC provides continuous surveillance and operational support for nationally significant infrastructure, ensuring the security and uninterrupted operation of strategic assets:

- Oil and gas pipeline surveillance
- Critical infrastructure protection
- Mining and mineral asset security
- Right of Way monitoring
- Construction project security
- Industrial facility surveillance
- Remote asset monitoring

Over the last six months, our operations have contributed to the sustained protection of the AKK Gas Pipeline corridor and Hydro Test Pipeline activities through continuous day and night aerial surveillance, proactive monitoring, and realtime intelligence support with no major security breaches recorded across several operational sectors.

MILITARY INTELLIGENCE, SURVEILLANCE & RECONNAISSANCE (ISR)

EIB STRATOC delivers persistent ISR capabilities that support military and security operations across multiple operational theatres:

- Persistent aerial surveillance
- Battlefield intelligence support
- Route reconnaissance and force protection
- Target area monitoring and mission overwatch
- Tactical intelligence dissemination

Our ISR operations have enhanced situational awareness for security forces, supported rapid operational decisions, monitored suspected bandit transit routes, and enabled coordinated responses between UAV operators and ground forces.

OPERATIONAL SUPPORT TO SECURITY AGENCIES

We work alongside defence and security institutions, providing intelligence that strengthens operational planning and field execution:

- Intelligence sharing and threat identification
- Live operational monitoring and incident reporting
- Search and clearance support
- Operational coordination and command and control support

This integrated approach has supported successful field operations including the defence of operational camps against armed attacks, early threat detection, and coordinated responses that protected personnel and strategic assets.

PROTECTION OF CRITICAL ECONOMIC ASSETS

Beyond national security, EIB STRATOC safeguards the critical economic infrastructure essential to Nigeria's development. Recent operations include:

- Protection of the AKK Pipeline Project
- Security support for hydro test pipeline operations
- Mining concession surveillance and illegal mining detection
- Monitoring of construction activities
- Protection of host communities

AKK GAS PYELINE PROJECT

AKK
VOLVO

AKK GAS PYELINE PROJECT

CATERPILLAR

COMMUNITY SAFETY & STABILITY

Security is measured not only by the absence of threats, but by the restoration of normal life. Across multiple Areas of Responsibility, EIB STRATOC's intelligence led surveillance has contributed to:

- Safe movement of commuters
- Protection of local communities
- Increased farming activities and secure trading routes
- Improved public confidence
- Continuous monitoring of high risk areas

MISSION SUCCESS IN ACTION

Recent operational achievements include:

1. Successful defence of a camp in Niger State during a coordinated armed attack
2. Support for law enforcement clearance operations resulting in arrests and recovery of illegally mined materials
3. Continuous protection of the AKK Pipeline and Hydro Test Pipeline corridor
4. Persistent UAV Intelligence, Surveillance and Reconnaissance (ISR) operations
5. Detection and disruption of illegal mining activities through real time aerial intelligence
6. Continuous monitoring of suspected bandit routes and high risk locations
7. Real time intelligence dissemination supporting military decision making
8. Real time intelligence dissemination supporting military decision making
9. Protection of critical infrastructure with sustained operational coverage
10. Enhanced coordination between UAV operators, analysts, and ground forces
11. Stable operational environments maintained across multiple Areas of Responsibility with minimal security disruptions

OPERATIONAL IMPACT MEASURABLE VALUE

- Enhancing national security operations
- Protecting strategic infrastructure
- Supporting military and law enforcement missions
- Improving real time situational awareness
- Enabling faster operational decisions
- Reducing operational risk
- Strengthening intelligence led security operations
- Safeguarding lives, assets, and critical investments

EIB STRATOC is not simply providing drone surveillance it is delivering integrated operational support that enables military, law enforcement, critical infrastructure operators, and private sector clients to achieve mission success. From securing strategic energy infrastructure and supporting military ISR missions to protecting mining operations and enabling intelligence led security responses, EIB STRATOC continues to provide the operational capabilities, technological innovation, and strategic partnerships required to protect Nigeria's critical assets and strengthen national security.

THE NIGERIA SAFE SCHOOLS PROJECT

Protecting the nation's future
150,000 schools at a time.

EIB STRATOC is the architect and operator of the Nigeria Safe Schools Project Fusion Center, hosted at the Nigeria Security and Civil Defence Corps (NSCDC) Headquarters. This national safety hub monitors over 150,000 schools across Nigeria, dramatically enhancing emergency response and situational awareness for educational facilities nationwide.

DATA SECURITY & CYBER WATCH

Intelligence is only as strong as the infrastructure that protects it.

To manage and protect sensitive intelligence, EIB STRATOC has deployed a Tier III, ISO certified, Uptime Institute certified, and NITDA compliant 200 rack data center. This world class facility houses high tech cyber security systems and advanced digital forensics capabilities ensuring that every byte of intelligence we handle is secured to the most demanding international standards.

- Tier III certified.
- ISO certified.
- Uptime Institute certified..
- NITDA compliant.
- 200 rack capacity with integrated cybersecurity and digital forensics.

NEXT GENERATION: IOT-ENABLED MONITORING

The future of surveillance is connected. EIB STRATOC is advancing the integration of Internet of Things (IoT) technology to provide real time monitoring at unprecedented scale. By connecting intelligent sensors across facilities, infrastructure, and operational environments, our next generation platform will extend the reach of the Fusion Centre delivering earlier warnings, richer data, and faster response.

STRATEGIC OPERATIONS & NATIONAL SUPPORT

EIB STRATOC has supported national security operations through:

- A Special Activity Center in Abuja
- Collaboration with all security agencies in Nigeria
- Digital forensics and cybersecurity services
- Military ISR (Intelligence, Surveillance and Reconnaissance) missions
- Classified satellite support for defence operations

RAPID AND ACCURATE INTELLIGENCE

Our intelligence platform transforms communication and location data into real time insights enabling swift, informed decisions in emergencies and tactical operations. When seconds count, EIB STRATOC delivers.

CORE INTELLIGENCE SERVICES

- **24/7 access** to critical intelligence
- Tracking of sensitive human and equipment assets
- Ongoing training for security personnel
- Nationwide search and rescue coordination
- Support for terrorist risk assessments

SECURITY PRIVACY ACCESS

STRATEGIC PARTNERSHIPS & DISTINGUISHED DELEGATIONS

Trusted by Nigeria's defence, security, and diplomatic community.

EIB STRATOC regularly hosts strategic visits, operational demonstrations, and knowledge exchange programmes for defence institutions, security agencies, government organisations, senior government officials, military leadership, foreign diplomatic representatives, defence attachés, industry executives, and strategic partners at its Intelligence Fusion Centre. These engagements showcase our indigenous intelligence capabilities, advanced surveillance technologies, and integrated command and control solutions while strengthening collaboration in support of national and regional security.
